About the project

AI-teach - Artificial Intelligence for primary school teachers is a 1 year Cooperation Partnership project in School Education, funded by the Erasmus+ Programme, that will end in September 2024.

The main objective of the project is to improve the understanding of the potential challenges and opportunities related to a responsible and interdisciplinary use of AI-driven tools in primary education.

Latest News

The handbook has been produced and published in four languages (English, Italian, Polish, and Czech), and it has been tested by teachers and students in all partner countries.

A Community of Practice called 'Artificial Intelligence for Primary School Teachers' has been created using the eTwinning group in the European School Education Platform, open to all teachers interested in exploring AI tools for primary schools.

Partnership

Learn how to work with AI at primary school

The main result is the **AI-Teach Handbook**, available as a PDF document and on the dedicated online platform. It covers the following topics:

- Basic concepts of AI
- AI Ethical implications
- Methodological aspects
- Collection of free AI-based tools
- Lesson plans
- School Case studies

Go to the '**Results**' section on the project website to explore them.

Join our eTwinning Community of Practise

This group serves as an online community for the AI-Teach project. **Teachers interested in implementing AI tools** in their classes will have the opportunity to establish contacts with a European community of people focused on innovating primary education and improving its level of digitalization.
